MAT WAIVER TRAINING

Completion of this free 4 hour in-person course followed by a 4 hour online course allows physicians to apply for the waiver to prescribe buprenorphine for treatment of opioid use disorder. ARNPs and PA-Cs require a 16 hour online course.

Non-prescriber OUD care team members, including RNs and Substance Use Disorder Professionals, are encouraged to attend.

Friday, February 7th, 2020
WENATCHEE

Time: 9:00 AM—1:30 PM
Location: Confluence Technology Center
285 Technology Center Way #102 Wenatchee, WA 98801
Host Organization: North Central Accountable Community of Health
Contact: Christal Eshelman <Christal.Eshelman@cdhd.wa.gov>
Registration: https://tinyurl.com/y566lsg3
DATA Sponsor: AAAP is the DATA 2000 Sponsor for this training

Learning Objectives
⇒ Screen and identify patients with OUD and define evidence-based treatments.
⇒ Discuss the pharmacology of opioids as it relates to treatment of opioid use disorder (OUD) patients.
⇒ Describe the fundamentals of office-based opioid treatment including the treatment of the co-morbid patient.
⇒ Explain the process of buprenorphine induction as well as stabilization and maintenance.
⇒ Discuss all FDA approved antagonist and agonist medications to treat OUD.
⇒ Discuss basic office protocols including medical record documentation and confidentially.

Funding for this training made possible in part by grant number 1H79TI081968 from SAMHSA and Cooperative Agreement Number NU17CE925007, funded by the Centers for Disease Control and Prevention. The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Centers for Disease Control and Prevention Department of Health and Human Services; nor does mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

Connect Your EHR to the Washington Prescription Monitoring Program Today!

Comagine Health (formerly Qualis Health) has teamed up with the University of Washington (UW) and the Washington Department of Health (WA DOH) to provide technical assistance to practices wishing to integrate the Washington Prescription Monitoring Program (PMP) into their electronic health record (EHR) system.

We are ready to support your clinic integrate the PMP directly into your patient’s chart. We welcome all specialties including primary care, behavioral health, surgical, and dental to participate in this opportunity to simplify workflows.

Benefits to Participation:

- **Fewer clicks** to access your patients’ controlled substance prescriptions
- **Increase time with patients** by having the PMP directly in your patients’ charts and eliminating the need for multiple sign-ins on different platforms
- **MIPS – gain bonus points** for connecting the PMP to your EHR
- **Complimentary** assistance from Comagine Health advisors to ensure the integration and implementation process is successful
- **Ability to provide direct feedback** to the WA DOH on the PMP through UW evaluation efforts

Six Building Blocks Practice Facilitator Training Program

The University of Washington and Kaiser Permanente Washington Health Research Institute are offering a free, WA Department of Health-funded training program for quality improvement personnel interested in learning how to guide clinics in implementing opioid management improvements through the evidence-based Six Building Blocks Program (www.improvingopioidcare.org). Quality improvement personnel will learn how to coach clinics in six key work areas, or "Building Blocks":

1. Engaging leadership and securing consensus
2. Revising policies and standard work
3. Tracking patients on chronic opioid therapy
4. Planning for visits and providing patient-centered care
5. Developing resources to care for complex patients (e.g., opioid use disorder)
6. Measuring success

The training includes an introductory webinar on March 26th from 12-1:30, a 1.5 day in-person training in Seattle on May 11-12, skill-building webinars, shared learning opportunities, and access to coaching workbooks and resources. Trainees will apply their learnings by coaching 1-2 clinics affiliated with their organization during the training program. Eligible organizations and their affiliated clinics may not have made any improvements or may already have made several improvements to management of patients with chronic pain. Travel costs to the training are covered by the Department of Health funding. This training is tailored to participants, and the Six Building Blocks team is committed to 6-12 months of coaching based on participants' needs. If you’d like to learn more, please contact Brooke Ike, Practice Facilitator and Trainer, at bike2@uw.edu.
RURAL MENTAL HEALTH INTEGRATION INITIATIVE

Premera is committed to promoting access to quality mental health care in underserved rural communities. The University of Washington AIMS Center is partnering with Premera to train and support rural primary care clinics in launching, expanding, and sustaining integrated mental health care programs.

Core Principles of Evidence-Based Integrated Care

- Population-Based Care
- Patient-Centered Team Care
- Measurement-Based Treatment to Target
- Evidence-Based Care
- Accountable Care

Eligible Clinics

- Located in a rural area of Alaska or Washington State
- Served at least 1,500 unique patients age 18 or older in the past year

Clinic Benefits

- Clinic-level support to plan and implement, or expand, integrated care teams
- In-person & virtual learning opportunities
- Training CEU for providers
- Free use of AIMS registry tools

- Patients receive increased access to evidence-based mental health care

Award Information

- Up to $245,000 per clinic
- Timeframe: August 2020 – Oct 2021
- Application for Cohort 2 due: March 31, 2020
