

# Breakout Rooms

Chelan-Douglas CHI: August 11, 2021  
Emergency Preparedness

## Breakout Room Group 2

### **Which vital conditions play a role and are affected in Emergency Preparedness? (Graphic on slide 4)**

Basic need for health and safety, thriving natural world

All important in some extent, great example of how interconnected health is

Reliable transportation, meaningful and civic muscle staying connected and community support

### **While thinking about these vital conditions, are there collaboration/partnerships that come to mind regarding emergency preparedness?**

Supporting and advocating for agencies having a emergency plan

Promoting the programs for those with special medical needs for emergencies

Promoting emergency preparedness agencies on social media during fire season

### **What can be done at the coalition level to support efforts around emergency preparedness?**

Promoting programs, sharing info back to agencies, think about what your agency emergency plan is and your individual plan is.

Distribute yellow bags, events for emergency preparedness, funding for a local project

## **Breakout Room Group 3**

### **Which vital conditions play a role and are affected in Emergency Preparedness? (Graphic on slide 4)**

Reason people is not prepared is they believe it will not happen to them.

At first glance, there's a disconnect between emergency preparedness and long term needs. Basic needs for health and safety, transportation, are immediate. Social connectivity seems more distant, but can have immediate consequences if you get in a situation where you urgently need help from the people around you. Having a friend who will look out for you is a lifesaver.

Elements like wealth, learning and housing have an effect on preparedness because they determine ability/inclination to prepare properly.

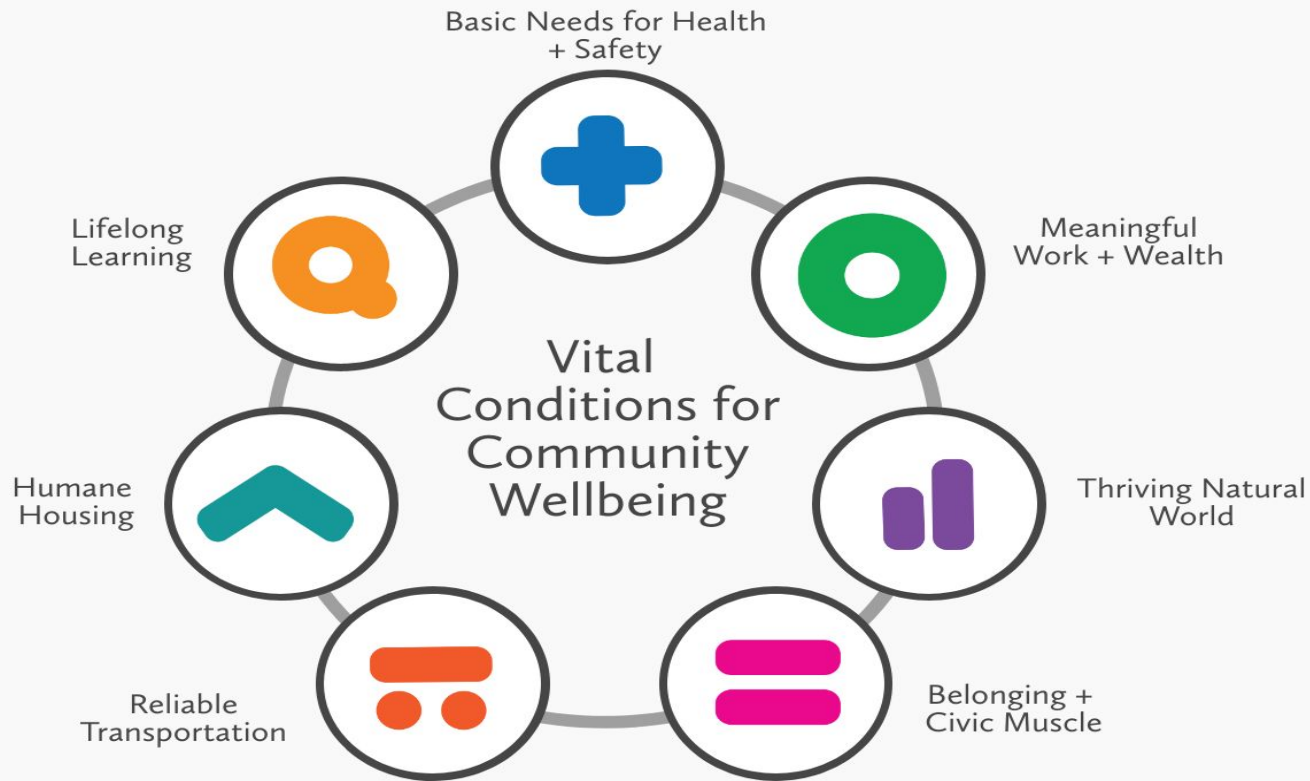

Different levels of disaster necessitate different levels of preparedness. Loss of electrical power means simple preparedness tasks become more complicated and require more prep.

### **While thinking about these vital conditions, are there collaboration/partnerships that come to mind regarding emergency preparedness?**

Deliver this presentation to more people!

### **What can be done at the coalition level to support efforts around emergency preparedness?**

Giving people a physical item of some kind reinforces the need for preparedness, AND their ability to actually do it. A flash drive that they can store all their documents on, a backpack to stuff with essential items.

"The Seven Vital Conditions for Well-Being is a useful framework for conceptualizing holistic well-being and the Conditions that give rise to it, as well as identifying levers for community change and improvement. It brings together major determinants of health, exposing how parts of a multi-faceted whole work as a system to produce population well-being." "This framework advances a collaborative, cross-sector approach to improving community health and well-being and helps identify where and how to invest in communities to yield better results over time."
