

# Mobility Council Barrier Report

---

The North Central Regional Mobility Council began meeting monthly following the Mobility Summit held in Wenatchee in June 2017. As the leadership team facilitates the council's development of a defined work plan, the group has created a Mobility Barrier Report form that will be used to collect mobility barriers as reported through community service providers in the region.

This report form is intended to be used by service providers and at this time, not intended to be used by individuals as a report form. The Mobility Council will be developing a consumer/individual survey to be distributed in the first quarter of 2018 to further collect information that will inform the strategic plan.

Please use the link below to submit a report via an online link.

Thank you for contributing to the success of the Mobility Council strategic planning process.

## Mission

To increase access to services to improve the wellness of our communities and vulnerable populations in Chelan, Douglas, Grant and Okanogan counties.

## Vision

The Mobility Council is a long term effort aimed at creating partnerships and identifying resources to expand and increase accessibility to existing services; and to advise the community on services needed to fill in the gaps.
