

## Why do you attend CHI meetings?

To learn about the local resources, barriers, goals of partner agencies, themes in the community around health care needs

To network with others in the community, share resources and offer support others.

Variety of topics really shows how all sectors play a role in SDOH's and overall community health

learn about resources and service gaps in the county

Network with other providers, identify needs in the community.

To make sure that all community members (minorities, income levels), folks from a variety of different backgrounds (languages, education levels, migrant status) are included. So their voices are included.

## Why do you attend CHI meetings?

The CHI provides one of the most diverse sector representation and really provides an opportunity to discuss opportunities to support, network and potential collaborative efforts

Enjoy the partnership ability and hearing from other community partners. Being informed on resources available to our community.

I like being able to share an announcement with Kelsey to then share with the broader group.

I attend CHI meetings to learn about different resources in our area and to hear about the gaps or needs that exist in our community and if there are any groups addressing those needs.

## Why do you attend CHI meetings?

I attend to keep up to date on what's happening across the Counties.

I like the topics that are discussed

I like to see Jackie, she is full of energy!

I also attend to share information about the services my agency provides.

## Why do you attend CHI meetings?

### Discussion Notes

Likes attending because the meetings are very informational in regard to resources in the area, she also invites other staff to join meetings.

Provides a very diverse sector representation and meetings offer a great opportunity to gather more information on a variety of topics

Early learning - concerns over where this is going, we forgot to show people that the research shows that children (4 and early) benefit from being in the classroom-so it is important to continue improving this system and sharing to families

There are several barriers with folks that are unemployed, so knowing the resources helps fill gaps and these meetings offer that support and connection/collaboration

# Mission Statement

## Discussion Notes

Looks great

1. could switch “with” with “of” and add comma after partners
2. other thoughts include “to provide a space involving”

## Which of the following do you think should be the CHIs leadership functions for 2022?

- **Collaborative Capacity:** Ability to work cooperatively with others in a variety of contexts, including collaborative learning, creative thinking, problem-solving, and decision-making
- **Support:** Cross-sector partnerships and networking
- **Advocacy:** Convene Legislative Forum and other forms of advocacy
- **Funding:** Identify opportunities and needs
- **Assess:** Current gaps and needs
- **Mobilize:** To assemble and make ready for action

## Leadership Function Discussion Notes

It would be good to have more feedback from partners that have not been present - reaching out to those partners that would be able to provide additional feedback

This committee with the breakout sessions really lets you hear about other agencies and what is going on and lets you have deeper conversations and allowing a great collaboration (moving forward it would be great to keep these breakout sessions so that everyone can still have that voice)

## Are there clear gaps and health disparities happening in Chelan and Douglas counties?

Access to mental health providers (not enough providers, long wait times to access care, lack of bilingual providers)

STI's

Mammogram rates

Adult obesity and inactivity

Access to care - Behavioral/Primary Care

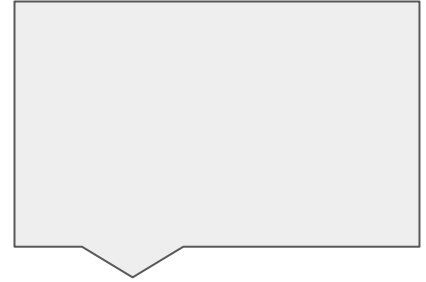

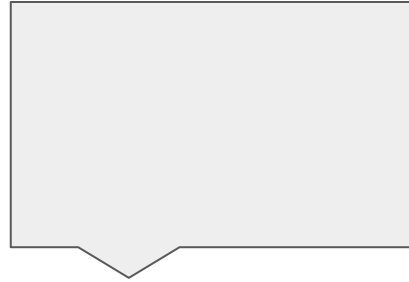

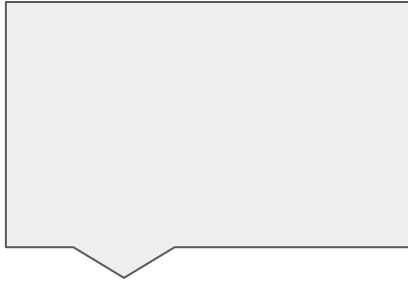

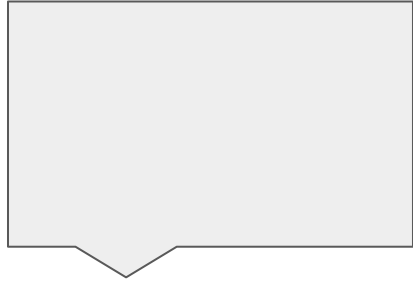

## Are there clear gaps and health disparities happening in Chelan and Douglas counties?

Resources for  
immigrant families

Support for H2A visa  
workers

Community wide  
communication efforts

## Gaps and Health Disparities

### Discussion Notes

Health - It would be interesting to have CHI support mammogram and STI information/education/screening - the information after COVID would be interesting to see as well - Confluence Health can provide some free check ups

Migrant/immigrant outreach - gaps with helping immigrant families get connected  
H2A worker gaps (seasonal)

Communications - lack of community-wide communication

If you imagine what the CD-CHI accomplishes in 2022, what would that be? Please be as specific as possible.

Out in the community more. Making more of what we do more public. Public campaigns

Social media

No wrong door concept. How can the CHI's support that

Support a multi-agency community event

Rural Communities

## CHI Accomplishments

### Discussion Notes

“Picture the headlines” - out in the community and advocating for people, making our group more public and sponsoring events/activities/programs-sharing our resources, How can we improve this?

Social Media for the CHI/More info shared or posted on the page.

The ability to do a warm handoff to individuals that are looking for help/resources

More strategic way to connect/having community events for sharing and educating

## Interested in the CD-CHI Leadership Council
