WPCC Workgroup

5/10/2018 Meeting

Today's Agenda

1. Welcome & Introductions
2. Feedback on change plan LAN and template
3. Review Updates to Stage 2 Funding
4. Preliminary review and feedback on “Domain I” assessment questions
5. Feedback on future LAN Offerings
6. Next Meeting

Recommendations from Last Meeting

- Primary care providers on last month's call didn't have any concerns with requiring primary care to update PCMH-A annually to measure progress
 - Did not feel more frequent updates to assessment were necessary
- Recommended PRAPARE as standardized tool to screen/assess social determinants of health (SDOH)
 - Feedback from broader WPCC group is that would prefer that we not require a specific screening tool (though could standardize questions that are asked)
 - Staff need to sort out how PRAPARE might interface with Pathways HUB.

Change Plan LAN and template feedback

- What is working?
- What could be adjusted to better meet provider needs?
- What is still unclear?
 - Do any expectations need to be clarified?
 - Measure specifications
- Recommendations from folks on the ground?
 - Should we delay the due date on some sections?

Stage 2 Funding – Current Thinking

Base

- Base amount adjusted based on # of encounters

Encounters	Base Amount
>75000	\$100,000
30000-74999	\$80,000
10000-29999	\$65,000
<10000	\$50,000

This would amount to about \$1,080,000 annually, across our 17 partnering providers. Disbursements contingent on quarterly reporting.

Pay for Participation

- Compensation per team per learning activity
 - Estimated at **\$1,240,000** annually, across our 17 partnering providers
 - Estimated 31 teams
 - Average of 4 learning activities per year per team
 - \$10,000 per learning activity per team

Draft “Domain I” assessment questions

Current Draft Proposal

Topic	Learning Objectives	Faculty	Type	Timing
Empanelment			Sprint	Late June 2018
Bi-Directional Integration	PC into BH	CCMI, CSI/AIMS	LAN	July-Aug 2018
Bi-Directional Integration	BH into PC	CCMI, CSI/AIMS	LAN	July-Aug 2018
QI Infrastructure	Hands on QI Basics	CCMI, CSI	1 – 2 day face to face meeting	July
Access Refresher	Supply, Demand		Sprint	August
Advanced Access	>85% continuity, managing panels		LAN	Sept-October 2018
Chronic Pain ECHO	Managing Chronic Pain, Safe opioid practices		ECHO	Q month, begin Sept 2018
Data Driven Improvement	Interpret first data report and plan for next quarter		Pre-work data submission, peer sharing and trends	November 2018
Population Health	Risk stratification, roles and workflows		LAN	November-December 2018
Hypertension Control	Increase % of population with controlled BP		Sprint (Every other week)	February 2019
